

SECOND MIDTERM GRADING SCHEME (PARTIAL CREDITS)
MATH 104, SECTION 4

Problem 1:

- (a)
 - Minor errors on checking the convergence at the end points: 13 points.
 - Major errors on checking the convergence at the end points: 10 points.
 - Something makes sense is written: get 2, 5, or 8 points depends on what's written.
- (b) No partial credits.
- (c) Something makes sense is written: 3 points.

Problem 2:

- (a) Only write down the definition of continuous at a single point: 3 points.
- (b)
 - Doesn't use Bolzano–Weierstrass to get a convergent subsequence: 13 points.
 - Something makes sense and related to the question is written: 5 points.

Problem 3:

- (a) No partial credits.
- (b) Something makes sense is written: get 2, 5, or 8 points depends on what's written.

Problem 4: Get the right answer but the justification doesn't work: get 5, 8, or 11 points depends on what's written.
